

MultiMix 4 USB

FOUR-CHANNEL USB MIXER

DESKTOP AUDIO, SOLVED. The MultiMix 4 USB is a four-channel desktop mixer with a USB digital audio interface built in. This compact mixer is perfect for using in basic computer-recording setups, video editing and production studios, and portable podcasting setups because it outputs not only line-level analog audio, but also stereo 16-bit, 44.1 kHz digital audio over USB for low-noise, easy computer connection.

The MultiMix 4 USB mixer has four input channels, all of which can accept a 1/4" line input. You can plug XLR microphones into channels one and two, including condensers thanks to the mixer's switchable 48V-phantom power supply. You can also plug a guitar or bass directly into channel one's switchable high-impedance input.

FEATURES

- Four-channel mixer with digital output
- Low-noise digital 16-bit, 44.1 kHz signal on USB for easy computer interface
- Four line-level inputs
- Two channels of XLR inputs with gains and switchable 48V phantom power
- High-impedance guitar input
