# JamManager Software
Install Guide

Instructions for installing JamManager Librarian on Windows

COMPUTER MINIMUM REQUIREMENTS

Windows® Vista (32/64-bit), 7 (32/64-bit), XP Home/Professional (32-bit)
- Intel® or AMD® XP Processor
- 1GB of memory (2GB recommended)
- Microsoft® Silverlight™ 4.0 installed
- Available USB port
- Internet connection (for updates)

DOWNLOAD AND INSTALL (WINDOWS)

Download the JamManager installer for your operating system to your desktop.

A. INSTALL ON WINDOWS® VISTA / 7 (32/64-BIT)

1. Double-click the installer icon on your desktop.
2. Click 'Next>' and accept the license agreement on the next page.
3. JamManager requires Microsoft® Silverlight™ to be installed to run. If you do not have Silverlight installed, click the link on this screen and follow the Silverlight Installation instructions (you need an internet connection to proceed).

4. Once Silverlight is installed, you can click 'Next>' to proceed with the JamManager installation. Enter a User Name and Organization when prompted and click 'Next>'.
5. Choose a different destination folder if desired when prompted or click 'Next>' to continue with the default installation folder.
6. Choose a different program folder if desired when prompted or click 'Next>' to continue with the default program folder.
7. Click 'Next>' to complete the installation

8. When prompted with the Windows Security screen, click 'Install'. This installs the necessary USB driver for the JamMan devices. This may take a minute to install.

9. Connect your JamMan device at this point to an available USB port.
10. On the last page, click 'Finish' to run JamManager.

B. INSTALL ON WINDOWS® XP (32-BIT)
1. Double-click the installer icon on your desktop.
2. Click 'Next>' and accept the license agreement on the next page.
3. JamManager requires Microsoft® Silverlight™ 4.0 to be installed to run. If you do not have Silverlight installed, click the link on this screen and follow the Silverlight installation instructions (you need an internet connection to proceed).

4. Once Silverlight is installed, you can click 'Next>' to proceed with the JamManager installation. Enter a User Name and Organization when prompted and click 'Next>'.
5. Choose a different destination folder if desired when prompted or click 'Next>' to continue with the default installation folder.
6. Choose a different program folder if desired when prompted or click 'Next>' to continue with the default program folder.
7. Click 'Next>' to complete the installation
8. Connect the JamMan device to an available USB port when prompted and click 'OK'.

Connect JamMan

⚠ Before proceeding, connect your JamMan to a USB port on your computer and make sure it is powered on.

[OK]

9. When 'Found New Hardware Wizard dialog appears, click 'Cancel'.

Found New Hardware Wizard

Welcome to the Found New Hardware Wizard

Windows will search for current and updated software by looking on your computer, on the hardware installation CD, or on the Windows Update Web site (with your permission).

Read our privacy policy

Can Windows connect to Windows Update to search for software?

○ Yes, this time only
○ Yes, now and every time I connect a device
○ No, not this time

Click Next to continue.

[< Back] [Next >] [Cancel]

10. When the 'Software Installation' screen appears, click 'Continue Anyway'.

Software Installation

⚠ The software you are installing has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.)

Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the software vendor for software that has passed Windows Logo testing.

[Continue Anyway] [STOP Installation]

11. When the 'Hardware Installation' screen appears, click 'Continue Anyway'.

Hardware Installation

⚠ The software you are installing for this hardware:

Jam Man USB Device

has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.)

Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the hardware vendor for software that has passed Windows Logo testing.
