

## New INPUT1/2 LEVEL LINK function added in Ver1.70

A new feature is added to enable setting recording level of INPUT1 and INPUT2 individually. It is useful when connecting microphones of different types to each jack.

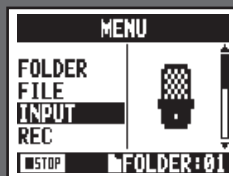

### Caution

- This feature is available only when MS MATRIX and MONO MIX are OFF in Stereo, 4CH, or Stamina mode.

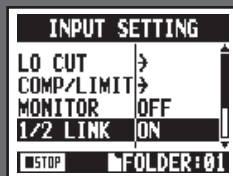

### Getting started

1. Press the [MENU] button.

In the Menu screen, select <INPUT>.

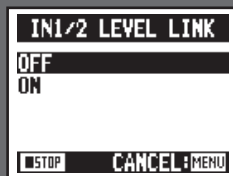

2. On the <INPUT SETTING> screen, select <1/2 LINK>.

3. Select OFF.

Now you can set individual recording level for [INPUT 1] and [INPUT 2].

### How to set individual recording levels

1. Press the [INPUT 1] or [INPUT 2] button, and select an INPUT jack as input source.

2. Press the [REC LEVEL] button.

An input selection screen is displayed, and [INPUT 1] and [INPUT 2] buttons start to blink.

3. Press either [INPUT 1] or [INPUT 2] button that you want to adjust the recording level.

4. Press the [REC LEVEL] button to adjust the recording level.
