novation LAUNCHPAD

Launchpad has been jointly designed by Novation and Ableton, integrating perfectly to place Ableton Live at your fingertips. With its multi-colour 64-button grid and dedicated scene launch buttons, Launchpad is purpose-built for triggering and manipulating clips in Live. The same grid also has a unique way of controlling Ableton Live's mixer, including volume, sends, muting and more. Launchpad features a dedicated **'Launchpad edition' of Ableton Live 8**, but with Novation's Automap software, it can instantly control almost any music software.

Ableton Live is known as the sequencer that is played like an instrument. Now, with Launchpad, you have all you need to truly 'play Live'.

MADE FOR EACH OTHER
Designed in partnership with Ableton, Launchpad integrates seamlessly with Live.

OPERATE AS ONE
Bi-directional communication between Launchpad and Live makes sure that software and hardware are permanently in sync.

INSTANT VISUAL FEEDBACK
See at a glance what's loaded, playing, or being recorded.

LAUNCH CLIPS & SCENES
The 64-button grid and scene launch buttons are ideal for controlling clips and scenes.

NEW TO LIVE?
Launchpad comes with 'Live 8 Launchpad Edition', fully functional for performance and composition.

CONTROL YOUR MIX
Launchpad's button grid provides a unique approach to controlling volume, sends, muting and more.

GO LARGE!
Launchpad supports multiple units. Connect up to six units at once!

THE WHOLE PICTURE
Navigation buttons and a 'Session Overview' let you see your entire set, then jump to control an area.

CREATE & PERFORM ANYWHERE
Launchpad gets all the power it needs via USB.

STAY PUT
With large rubber grips to hold it steady, once you choose a performance position for Launchpad, that's where it stays!

SESSION VIEW
Ableton's unique Session View displays across Launchpad's 64-button grid. See at a glance what clips are loaded (amber), playing (green) or recording (red).
